ROTARY LIFT

Hydraulic Portable Lift

Productive, Flexible and Easy

The hydraulic portable (HP) lift consists of four or six columns with adjustable wheel forks for different wheel sizes. In combination with multiple accessories, the HP lift can handle almost any vehicle configuration or repair need in commercial fleets.

These durable hydraulic lifts are reliable and easy, utilizing automatic synchronization and double safety systems. The lifts provide a convenient method to lift heavy-duty vehicles with no expensive installation necessary. This unit quickly turns empty space, indoors or out, into a repair, inspection or wash area.

Movable Carriage Forks

- Allows pick-up of smaller vehicles
- Eliminates the need for "small wheel" auxiliary adapters
- Accommodates wheel sizes ranging from 13" to 22 1/2"

Column Assemblies

Columns contain a fully enclosed hydraulic cylinder in the carriage. A combination of rollers and slider blocks provide maximum stability. The columns have a 9" clearance from column to carriage forks and spring activated mechanical locks with locking positions every 4".

Synchronized Leveling Bar

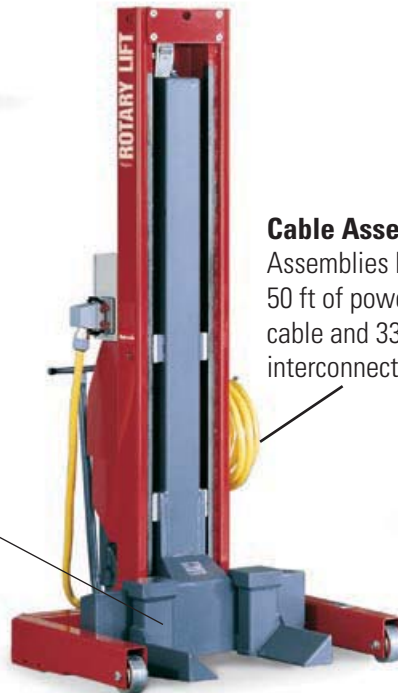

Constantly maintains a range of 1/8" to 1/2" leveling between all lift carriages.

Visual Leveling Window

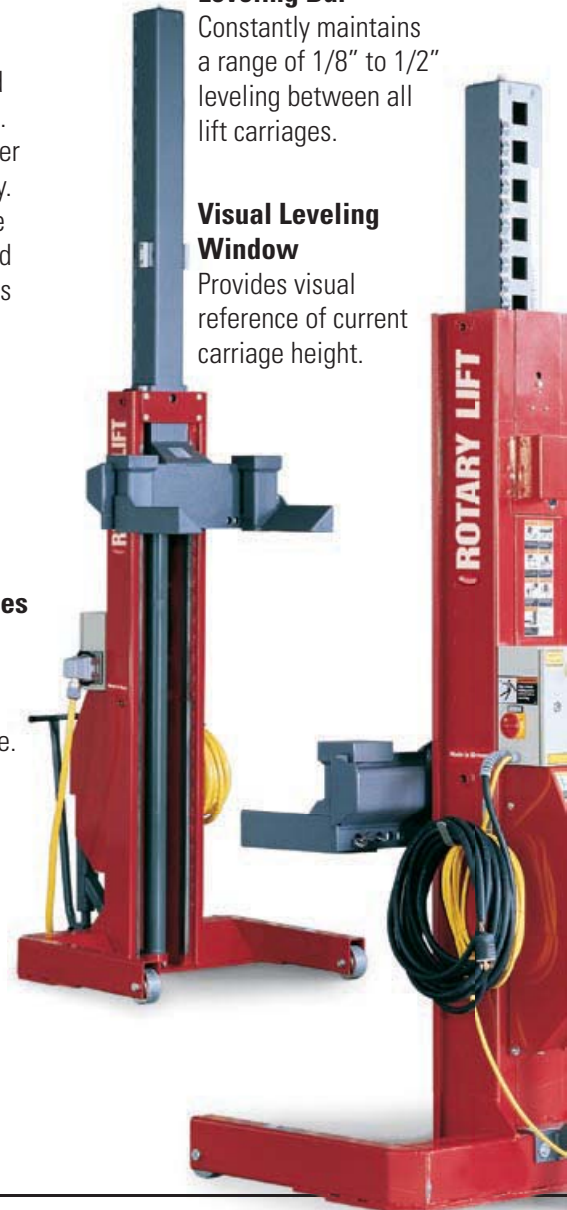

Provides visual reference of current carriage height.

Cable Assemblies

Assemblies have 50 ft of power cable and 33 ft interconnect cable.

Optional Accessories

Column Power Unit

Each unit is equipped with a 2 HP motor, adaptable to 208, 230 and 460v (3-phase, 60hz.), with manual lowering capabilities for each column in case of power loss. The hydraulic system contains a check valve to secure the load at any position.

tripod stand

Tripod Stands - Model RS150

- 15,000 lbs. capacity
- Spring loaded caster wheels for easy positioning and portability
- Spring assisted height adjustment in 1" increments ranging from 56" to 82 1/4"
- 4" fine-tune adjustment
- Also available in 33,000 lbs. capacity

fork lift adapters

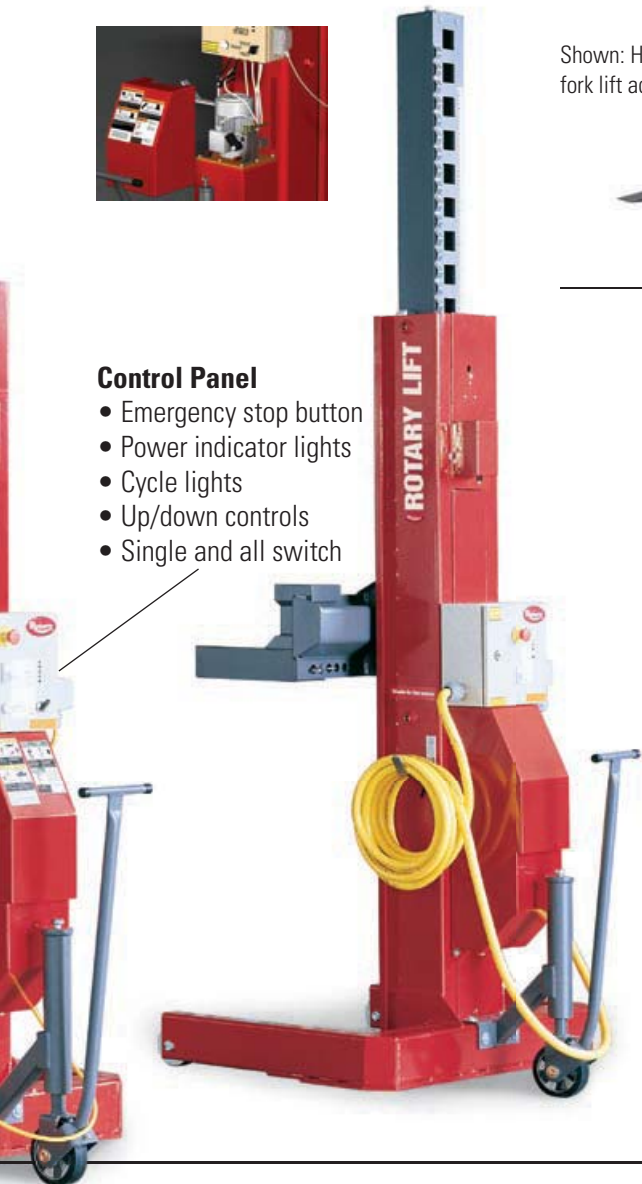

HP Fork Lift Adapters

Rotary's fork lift ramp kit makes it easy to service fork lifts using Rotary® hydraulic portable (HP) lift columns. Tool flexibility and ease are critical when trying to service any piece of equipment. The ramp kit easily attaches to the base of the column giving the clearance needed to raise fork lifts with a capacity of 10,000 lbs.

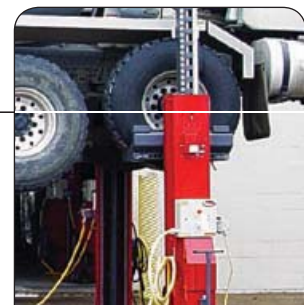

Control Panel

- Emergency stop button
- Power indicator lights
- Cycle lights
- Up/down controls
- Single and all switch

Hydraulic Portable Lift Specifications

Model:	HP415	HP615
Number of Columns	4	6
Lifting Capacity (per column)	15,000 lbs. (6800kg)	15,000 lbs. (6800kg)
Lifting Capacity (total)	60,000 lbs. (27000kg)	90,000 lbs. (40820kg)
Rise	67" (1702mm)	67" (1702mm)
Height (lowered)	88 1/2" (2248mm)	88 1/2" (2248mm)
Height (raised)	150" (3810mm)	150" (3810mm)
Width Overall	45 3/4" (1162mm)	45 3/4" (1162mm)
Length Overall	43 5/16" (1100mm)	43 5/16" (1100mm)
Motor	2hp	2hp
Voltage	208-230/460v 3-phase	208-230/460v 3-phase
Speed of Rise	130 seconds	130 seconds
Control Voltage	24v DC	24v DC
Lifting Mechanism	hydraulic cylinder	hydraulic cylinder

Rotary Lift® is the world leader in service bay productivity. We offer a broad range of solutions to make any service bay more productive.
