

ACCESSORIES

Bogie transfer table.

Portable work lights.

Transmission jack.

Spring loaded support stands.

Lining pads.

Ultrasonic detector.

DESIGN – SERVICE

Design

Each lifting system is designed by our in-house Engineering Department to meet your specific needs. Our priorities are safety, reliability and compliance to international safety standards (including ISO 9000).

Commissioning - Training

Our team of professionals are at your service to train your maintenance operators.

Service contracts

Just call our Service Department where our team of trained technicians and spare parts specialists are waiting to provide you with the service you deserve, direct from the manufacturer. We can supply you with the best delivery time on the manufacturer's original parts.

Mobile lifting jacks for train maintenance

More than 2500 equipment in operation throughout the World 

MOBILE LIFTING COLUMNS WITH FIXED CLAWS

Proven expertise

Automatic lub pots.

Lifting synchronization system.

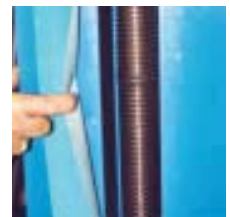

Hydraulic tow handle with safety release.

Interchangeable lifting claws.

Large handles for easy lift handling.

Nylon protection band and cold rolled lifting screw.

Among our customers :

Japan - 10 t .

France - 5 t.

Switzerland - 25 t.

France - 8 t.

SEFAC FIXED CLAW MOBILE COLUMNS "PLUS"

- Easy to move : optimum weight and design.
- Pallet type tow handle with safety release device.
- Designed to be used in areas with limited work space.
- Maximum safety : Proven non reversible electro-mechanical system.

The SEFAC mobile columns for railway applications :

The equipment you need

2500
International
references in
the world

- Performing railcar maintenance anywhere in the workshop.
- Working on all types of vehicles.
- Implementing the low cost solution : no civil engineering required.
- Choosing the most user friendly equipment.
- Achieving higher productivity from your equipment.
- Ensuring safe working conditions for your operators.

Fixed claw or retractable claw Which system will meet your requirements ?

Consider the following :

- What is your business? Railcar manufacturing or maintenance?
- Type of maintenance : preventive or repair?
 - Time required for vehicle repair or maintenance?
 - Frequency of lifting cycles?
- Location where the equipment will be used in the workshop?
- Other requirements specific to your project?

SEFAC railway mobile columns :

- Non reversible screw drive system (self-locking).
- Bronze load nut.
- Steel safety nut.
- Suspended cold rolled lifting screw for a better durability.
- Cold rolled lifting screw to reduce load nut wear.
- Synchronization between all the columns by a linear motion controller.

- User-friendly : pre-selection of all lifting modes.
- Capacity : from 5, 10, 20 and 25 t per column.
- Lifting height from 2000 to 2500 mm (different height on request).
- Sets of 4, 6 columns up-graded to 8, 12 (or more on request).
- Every lift is checked on an approved test bench under static and dynamic loads.

SEFAC, a team of railway lifting equipment specialists.

MOBILE LIFTING COLUMNS WITH RETRACTABLE CLAWS

More than
30 years
experience

Automatic lub pots.

Lifting synchronization system.

Bellows to protect the lifting screw (option).

Hydraulic pump with safety.

Motor geared column displacement system with foot protection.

Among our customers :

France - 20 t.

Taiwan - 25 t.

France - 20 t.

United-Kingdom - 15 t.

SEFAC RETRACTABLE CLAWS MOBILE COLUMNS " PLUS "

- Real flexibility : the design of the base and the movable lifting claw enable the lifting of multiple vehicle types with one set.
- Compact design : easy access around the columns.
- Simple and sturdy construction.
